

Supply Chain Specialist, BioCare Copenhagen

BioCare Copenhagen is a young and most successful Danish bioscience company specializing in gut health, metabolism, infections and immunity, the company received the Danish Gazelle award in 2016, 2017 and 2019. Biocare Copenhagen's activities are based on research at the Copenhagen University Hospital (Rigshospitalet), but operates as a global player offering high-quality white label probiotic supplements and complete product concepts in more than 40 countries. Since December 2017, BioCare Copenhagen has been part of Royal DSM, which is the world's biggest provider of nutritional solutions for human and animal nutrition. For further info please refer to www.biocarecph.com.

As Supply Chain Specialist you will be a liaison between suppliers of raw materials, production and packaging facilities and customers. You will join the local team of 6 highly skilled and motivated colleagues, and have close contact to colleagues, customers, suppliers and other partners world-wide, you therefore have to be flexible regarding working across time zones. The team is located in the Danish Royal DSM Office in Broendby, Greater Copenhagen, and you will report to the Business Operations Director.

The Challenge

As Supply Chain Specialist you will be responsible for the establishment of the supply chain setup, for master data, and operational launch of branded products in target markets. The key tasks involve the operational handling from introduction of new formulations to delivery of the final products to partners globally. You will work on challenging projects, new market entries, and agile supply chain setups, as well as daily order handling for branded goods and upcoming product launches.

Your primary tasks will include, but not be limited to:

- Local project leadership on operational tasks of product launches for branded goods
- Support of project team in ERP set-up and master data verification and handling
- Handling of day-to-day orders in a newly established portfolio
- Purchasing and invoice handling
- Collaborating on forecasting and stock keeping of raw materials
- Artwork coordination between marketing departments and the packing site
- Resolution of distributor and stakeholder challenges to maximize end customer satisfaction
- Establishing and monitoring of key performance indicators of portfolio operations

The environment in BioCare Copenhagen is characterized by freedom with responsibility, and an informal culture where everybody contributes and takes responsibility. As part of the Royal DSM family, you will have great opportunities to develop both personally and professionally.

Candidate Profile

The ideal candidate has a minimum of 5 years' ERP and Supply Chain/Logistics experience – preferably from nutritional products, food industry, med-tech, pharma or similar. Experience with creating operations project workflows and new product launches is regarded an asset, and you must be used to working in ERP systems and master data setup. Experience with SAP and/or Navision would be beneficial.

As a person, you are able to take responsibility and work independently. You understand the importance of executing in high quality and meeting your deadlines. Furthermore, you are flexible, service minded and a good team player, who really enjoys close contact with customers and suppliers. You must be fluent in English, and preferably Danish, both orally and in writing.
